PROFILE

I am a Computer Engineering student at Rajamangala University of Technology Isan, who wants to learn new experiences, and develop myself in the right direction.
I am ready to work collaboratively with the team and contribute creative ideas with others. I am looking for opportunities to intern as a Web Developer, Frontend Developer or UX/UI Designer

WORK EXPERIENCE

PROJECT

Database Management Project

- The project is a simple web application developed to mimic some basic functionalities of Instagram. It was created using the AltoRouter framework for routing, PHP for the backend, and MySQL for database management.

Movie Recommendation App

- This Movie Recommendation App is a mini-project for the course Development of Mobile Devices. It is a Flutter application that helps users discover popular movies and filter them by genre. The app utilizes the TMDb API to fetch real-time movie data and display it in an intuitive interface, allowing users to browse movies by genre and view detailed information for each movie.
